# The Cook Kissed Himself

# ***Anthropomorphism***

The attribution of human traits, emotions, or intentions to non-human entities. It is considered to be an innate tendency of human psychology.

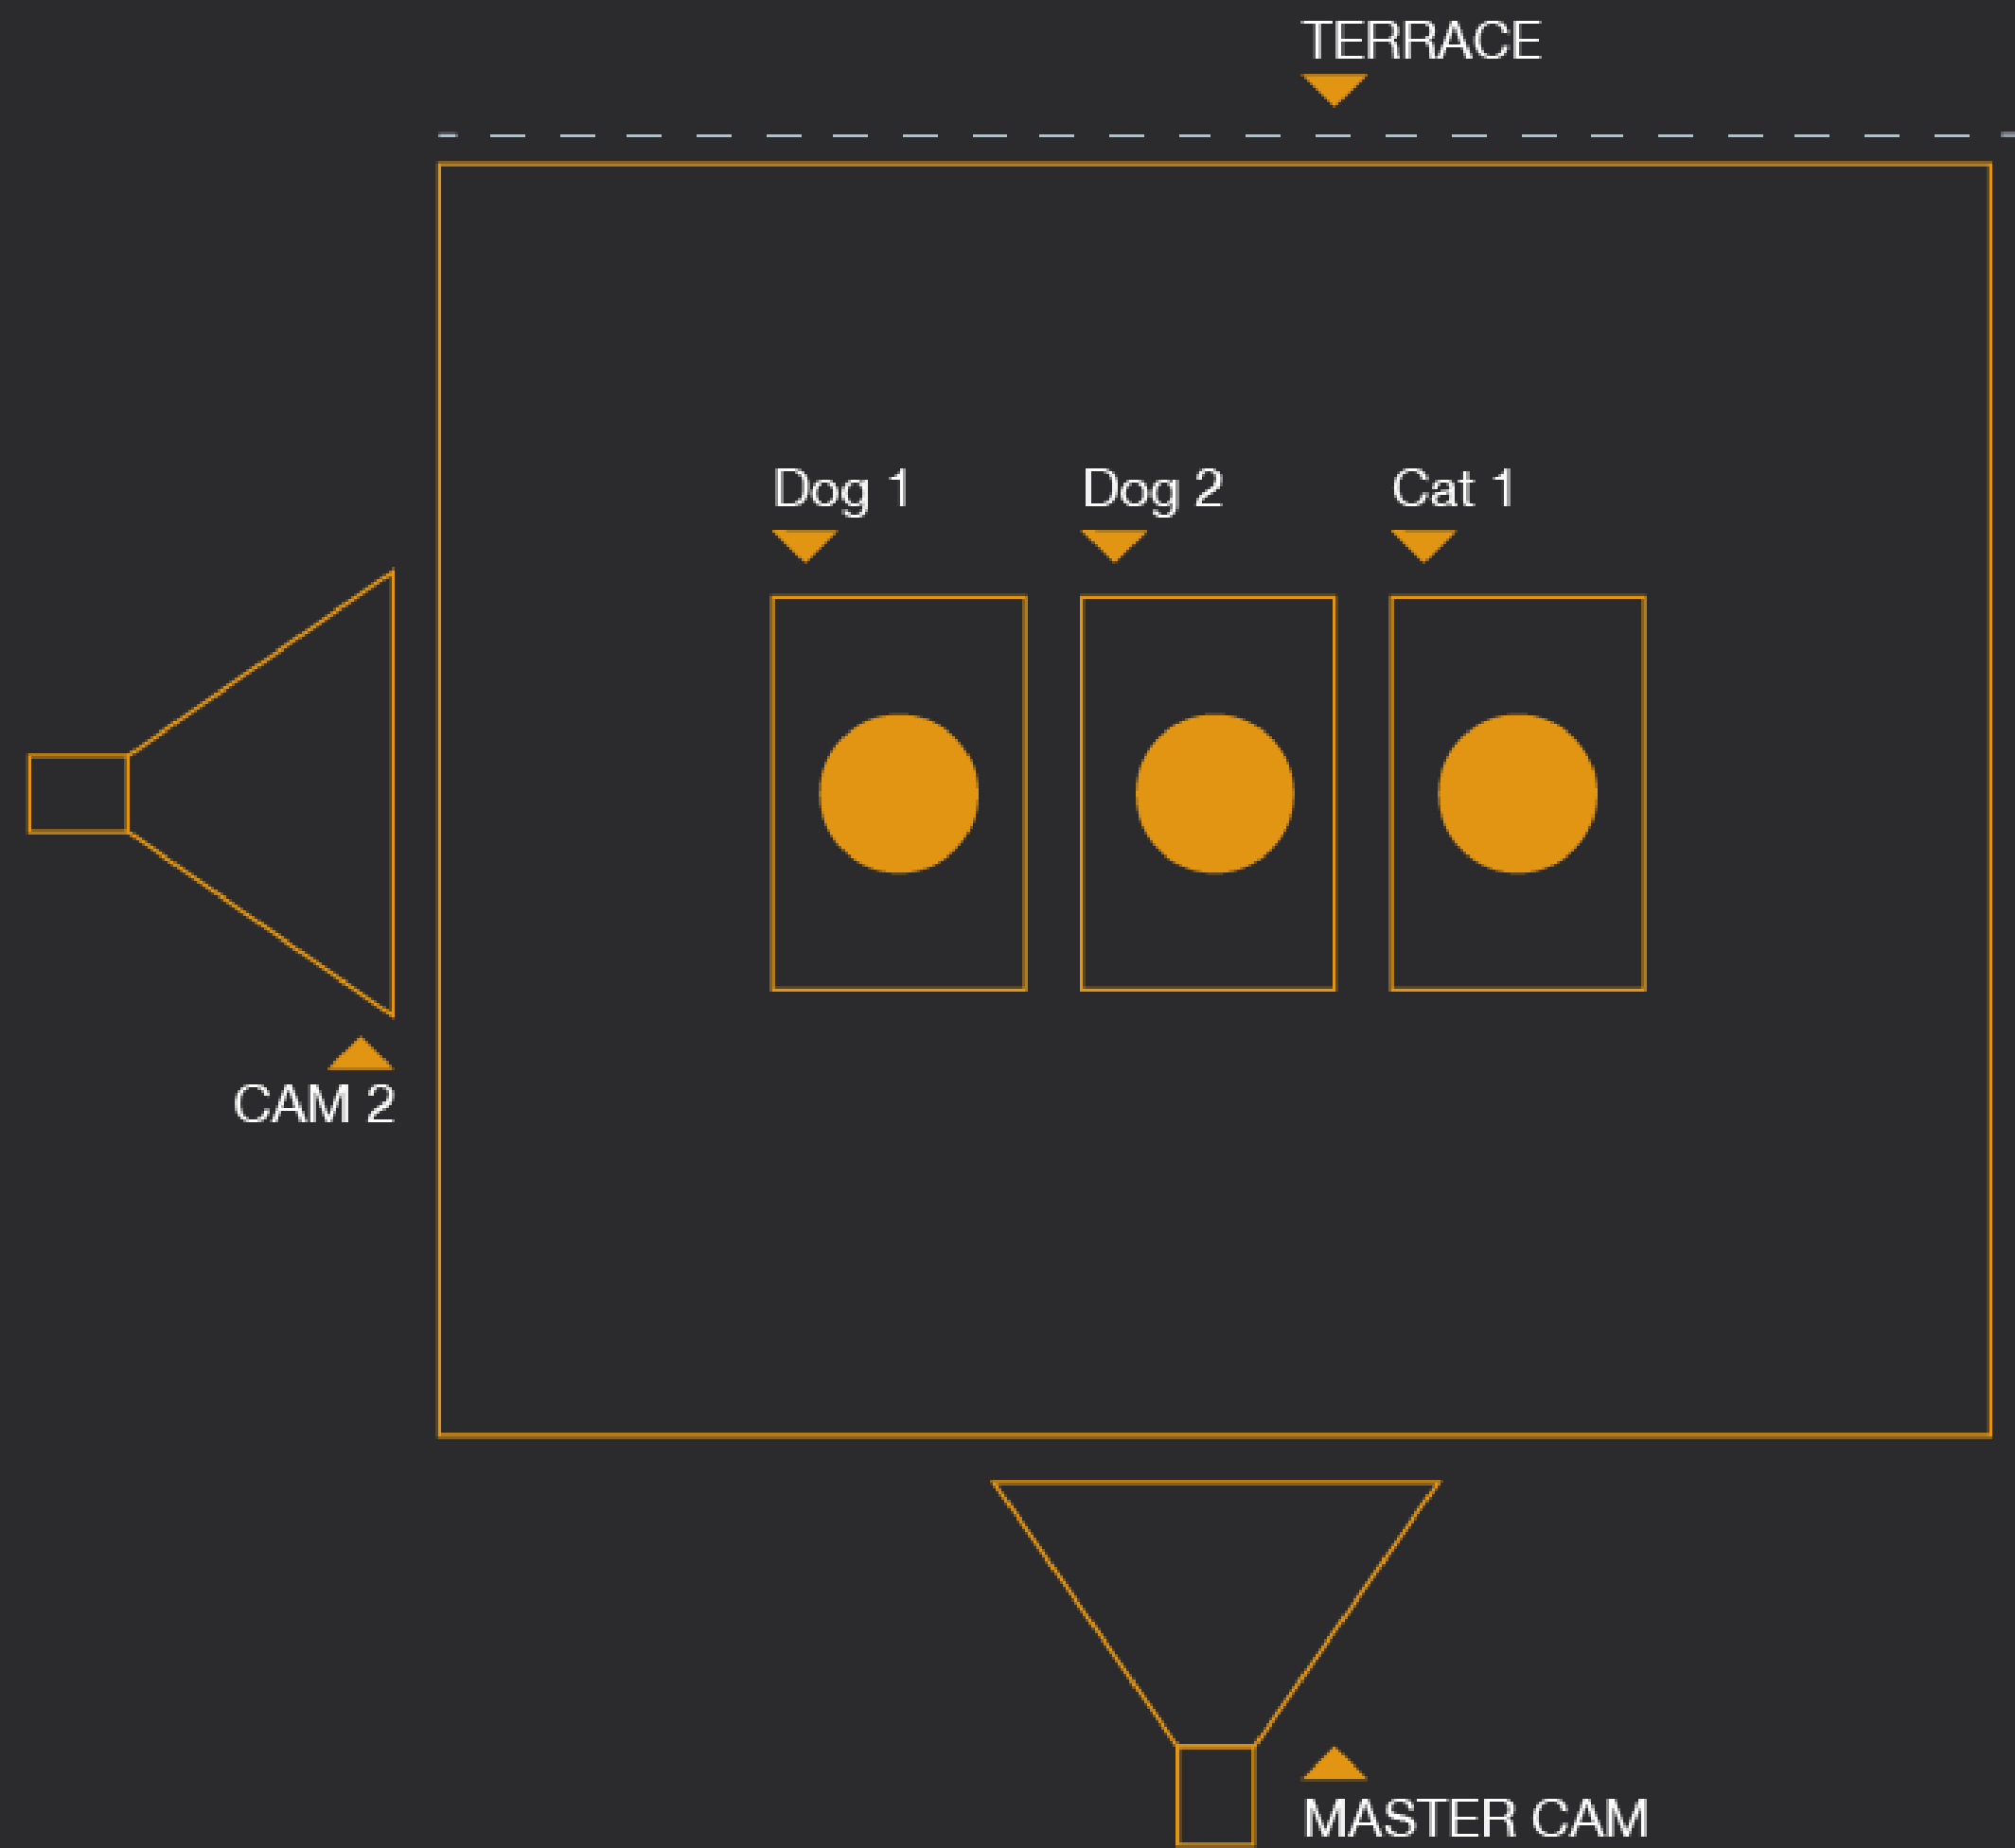

# Intent

Exploring 'Anthropomorphism' I set-up a table that had animal food camouflaged with human aesthetics.

Based on the concept of a waterhole, an arrangement was planned where all creatures could eat together.

The final product was to be consumed until nothing remained.

# The Waterhole Concept
