

My Art Manifesto

Saira Bano

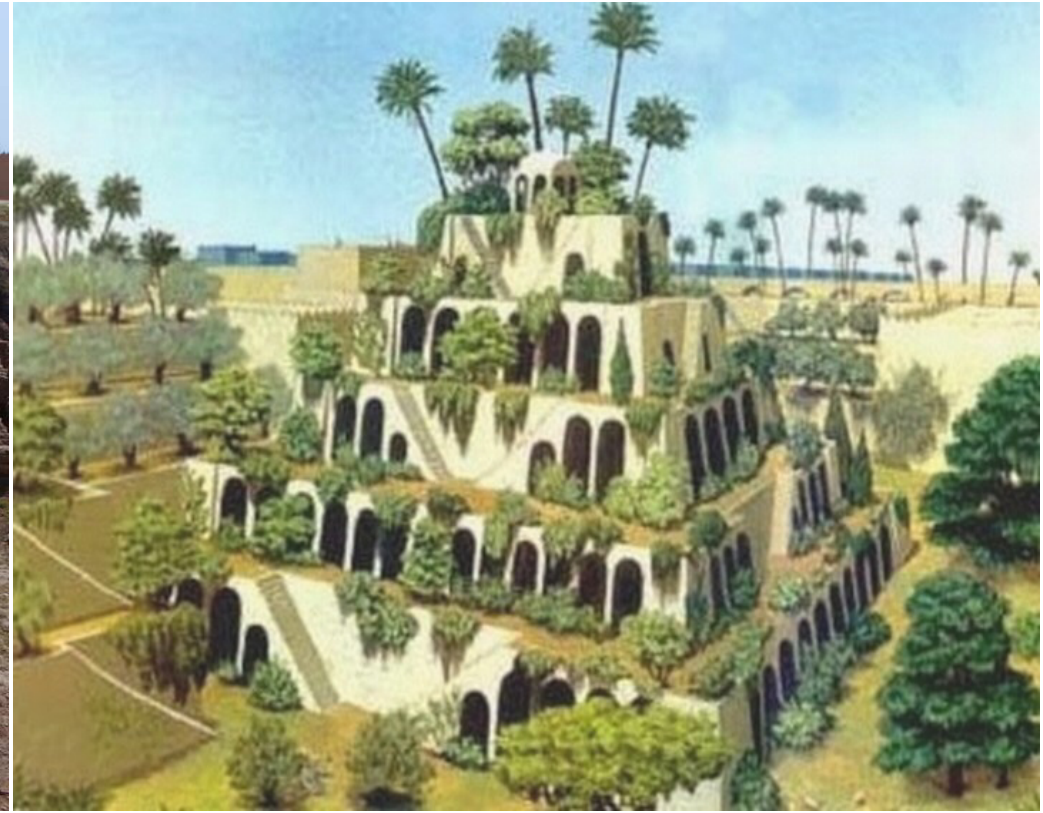

Submitted to: Madyha Leghari & Aatiqa Sheikh

What is creativity?

- Creativity instills curiosity.
- Creativity exists in many different forms across many different areas of work, thinking, and problem-solving.
- Creativity allows us to view and solve problems more openly and with innovation.
- Creativity opens the mind. Creativity frees the mind in a way that enables a person to absorb knowledge more easily. It makes processing learning more efficient.
- A society that has lost touch with its creative side is an imprisoned society, in that generations of people may be closed minded. It broadens our perspectives and can help us overcome prejudices.

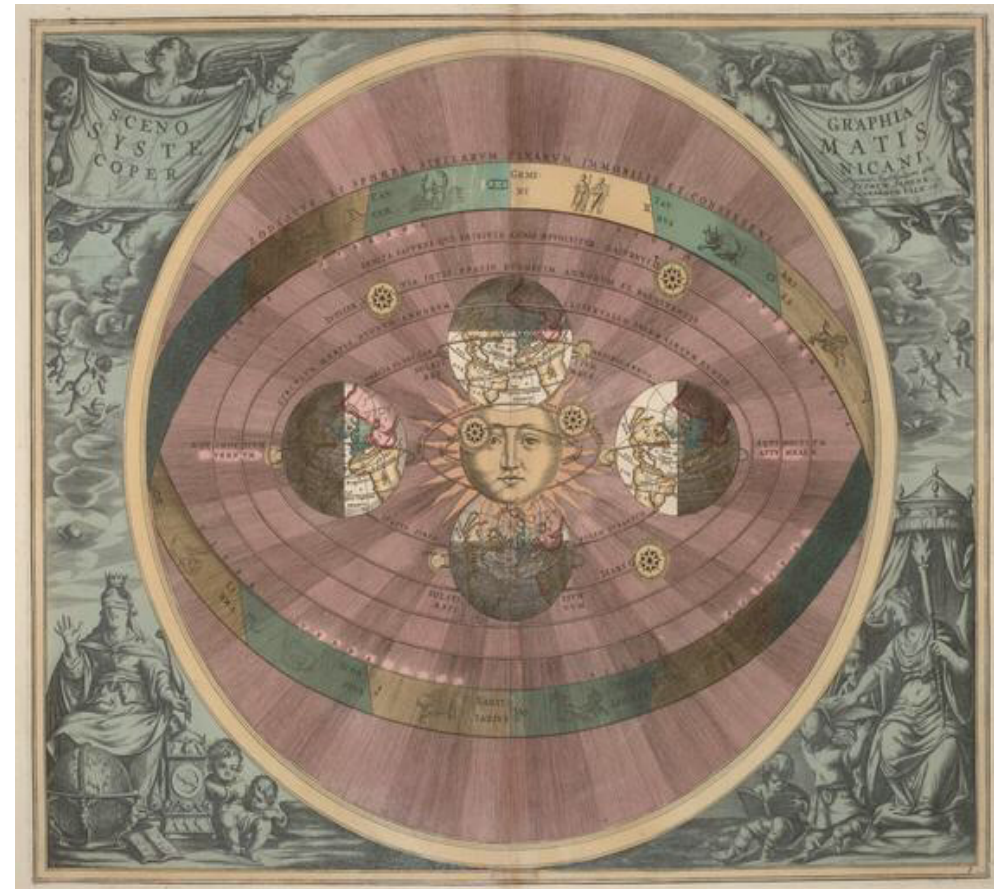

Hanging Gardens of Babylon

Pyramids Of Egypt

Copernican heliocentrism

Nurturing Creativity Through Art?

- Art is the medium, craft, and/or result. It doesn't even need to be traditional *“art”*. It could be a service or product.
- Creativity is the process. It's basically solving a *“problem”*.
- you don't need to be an artist to be creative.

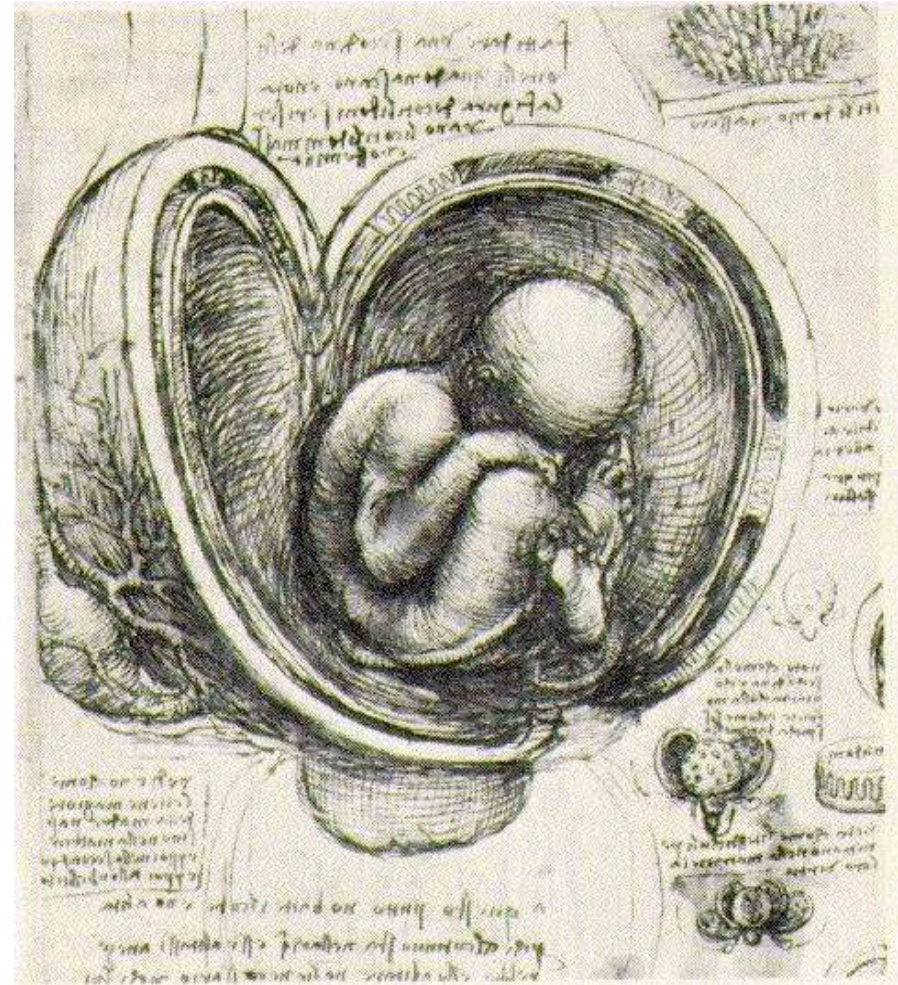

Historical influences

- 1. Plato
- According to Plato's book "The Republic" Plato thought that art was meaningless unless if it Served Society in some way to increase the knowledge of people or make them accept life for what it is and not fear death.

Renaissance Academy

- Leonardo da Vinci
- where art practice based on search of universal knowledge and scientific reasoning.

Colonial Art Approach

Art Education

- Art education is all about giving opportunities to people, whether children or adults, to be creative.
- ART education is not about how well you paint or how well you draw. It's the process of brainstorming, inventing, creating, problem solving, troubleshooting, decision making, storytelling, reflecting. It's for everyone. It's for the community.
- look at things from a creative perspective. Be it math, science, languages or drawing,
- As vision dominates our senses, enhanced visual abilities which develop observational capabilities. We see what others don't. Therefore, we more thoroughly define issues, problems, and opportunities and we more creatively resolve them.

STRATEGIES TO CHANGE MIND SET

- Interdisciplinary Approach in Art Education
- Mandatory arts learning should be introduced at all academic levels.
- Artistic skills may not be the criterion to merit but the Creativity & aptitude.
- Should be introduced in several training programmes being imparted at various training institutes.
- Art may also be used as a helping tool while studying or teaching scientific knowledge.
- Arts always tend to make a bewitching blend with any other discipline
