

STORY MAPS: MAPPING PERSONAL SPACES

Tanzeel Saeed

Thinking Through Material

Mapping Exercise: Final Submission

This is my take on the mapping exercise and how I have understood it. The rooms in the maps are labelled by the actions that are majorly performed in them instead of their actual names. As the assignment was open ended I chose to work digitally using a mapping site and images as my material.

Since I have created a digital Story Map using ArcGIS I am sharing the link to it [here](#).
