

- The concept of my thesis revolves around the lifecycle of a butterfly and how it resembles the evolution of human being both go through the same four stages of life.
- Butterfly from egg to a caterpillar to a Chrysalis and finally a beautiful Butterfly.
- The human from birth to an infancy to adolescence and evolve into a bolder smarter and freer self's.

# LIFECYCLE OF HUMAN

- The Fetus stage in the **life** of a **human** most closely compares to the Egg stage in the **life** of a **butterfly**.
- The caterpillar stage can be compared to the infancy through preteen period in a **human's life**. Just **like** the caterpillar
- This is the time for a **human** to mature in order to prepare for the next stage of their **life**.
